# Sections

It's important to categorize your information into clear sections.

Use headers, boxes, or even various colors to do so.

# Choosing A Template

- Look for templates with 6 categories.
- If you are adding *diagrams or pictures*, count how many and add that to your total categories #

- This ensures **everything** fits on the page.

# Fonts

- Depending on the template, some fonts may be preload
- This is **NOT** a time to choose a fun font
- Aim for clear, easy to read font:

Times New Roman, Roboto, Calibri, even Arial

# Font Size

- Title should be the *LARGEST* font on the poster, sources can be the *smallest*.
- Play around with font size. Try not to go below 10-12 pt.
- If you can't fit everything, don't change font size, change line spacing.

# Where To Get A Template

```
Prepared Research Poster, 24 x 36 Inches, Landscape Format Option 1 Template
```

- **Option 2 Template**
- Option 3 Template
- **Option 4 Template**

Prepared Research Poster, 36 x 48 Inches, Landscape Format

- Doption 1 Template
- Option 2 Template
- Option 3 Template
- Option 4 Template

# Title

Authors

# Introduction

What is the central research problem or question you have been helping to explore?

What was your approach in conducting your research? Why is this approach unique, new, or corrective compared.

# **Methodology and Analysis**

What was your approach in conducting your research? Why is this approach unique, new, or corrective compared to what has been done before? What materials, sources, images or data illustrate your research?

# Discussion

What did you find? Consider sharing examples or brief case students that capture what you have discovered.

# Background

What work has been done previously in this area?
This section can be a review of the literature that has been most important in your research area.

# Conclusions and Directions for Future Research

What were your conclusions?
What remains unanswered and what are the potential areas for future research?
